

✦ PROFILE

Currently handling brand content and visual work at Dersheng Caster — covering website architecture and publishing, SEO/GEO content collaboration and optimization, product photography, motion shoots, catalogs and exhibition materials, social assets, e-commerce support, and cross-team collaboration. Five years of self-taught growth in environments with no established marketing process and little mentorship. **I can carry work that would normally be split across multiple roles — and when there's a team, I know how to divide the work and connect everyone's ideas.**

✦ EXPERIENCE

Brand Content & Visual Operations

Dersheng Caster • 2021 – Present (5 yrs)

- Own website architecture, design, and publishing; continuously review click, impression, and content-change data
- Handle agency-provided articles, focusing on what's within my control — implementing AI-recommended fixes, cutting LCP load time, rewriting content to be more engaging, tracking results via GSC
- Handle product photography, retouching/cutouts, DSLR and gimbal shooting, plus catalogs, exhibition materials, social graphics, and event merch design
- Support e-commerce listings, fulfillment, customer service, and pricing; coordinate event planning, social communication, venue setup, and cross-team work
- Co-designed a "website × social" two-way traffic loop with a colleague: I built the web game, they planned the social contest mechanic and posts

✦ KEY RESULTS

+16.5%

Site Click Growth
Period-over-period
after SEO/GEO work

Self-Initiated Uses
6-language build,
reached Thai fans

✦ CASE HIGHLIGHTS

aespa 5th Anniversary Café

Solo-organized a 3-day event end to end — concept, venue negotiation, menu discussion, merch design, and on-site execution. Drew 250+ visits, 60K+ total social impressions, and over NT\$170K in sales.

"We genuinely admire how much care they put into it" — the partner venue, in an unprompted IG post

Website SEO / GEO Optimization

Focused on what I could actually control on the site side: implementing AI-recommended fixes, cutting LCP, rewriting content, tracking trends via Google Search Console. Clicks recovered 16.5%, impressions grew 10.1%.

Self-Initiated: aerea51tw

Self-initiated and solo-built a 6-language interactive site and web game, directing AI tools to ship it. Over 1,050 uses since launch, with reach extending into the Thai fan community.

- ✦ **One step further:** I don't just finish tasks — the café event had a planned "time tunnel" visual journey, SEO turned data-watching into an ongoing habit, and the self-initiated project shipped in six languages. I make a habit of leaving one detail people remember.
